PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer specializing in scalable web applications and AI-integrated solutions using React.js, Node.js, and Java Spring Boot. Experienced across the full product lifecycle, combining robust server-side architecture, Spring AI capabilities, and CI/CD automation with high-end UI design to deliver secure, industry-leading platforms.

TECHNICAL & SOFT SKILLS

Frontend:	React.js, Next.js, JavaScript, Tailwind CSS, Responsive Web Design, Wireframing
Backend & AI:	Java, Spring Boot, Spring AI, Node.js, Express, RESTful APIs, Microservices, Kafka, JWT
Databases:	MySQL, PostgreSQL, MongoDB, MariaDB, Firebase
DevOps & Cloud:	Docker, Jenkins, GitHub Actions, CI/CD Pipelines, Git/GitHub, AWS, GCP
Additional:	N8N, Generative AI Integration, Adobe Photoshop, Capcut, MS Office
Soft Skills:	Communication, Problem Solving, Teamwork, Mentorship

WORK EXPERIENCE

Full-Stack Engineer

May 2025 – Present

FutureDesks Services (Full-time)

- Architect and engineer scalable software designs and high-performance client-side interfaces utilizing React.js.
- Collaborate with cross-functional development teams to build secure, modular microservices and robust application workflows.
- Optimize web infrastructure to enhance user interaction, system reliability, and responsive design across platforms.

Freelance Web Developer & UI Designer

2024 – Present

Self-Employed (Fiverr, Contra)

- Architected full-scale Software as a Service (SaaS) platforms, focusing on clean layout hierarchies and streamlined application logic.
- Developed highly interactive, visually responsive custom web concepts featuring dynamic front-end state management.
- Integrated Spring AI into backend architectures for startup clients, enabling advanced automation and intelligent data processing workflows.

TECHNICAL PROJECTS

- TapandDine:** Engineered a comprehensive Multi-Tenant SaaS Point of Sale (POS) and Restaurant Management Platform. Built a robust backend with Spring Boot 3 and MySQL, featuring Role-Based Access Control to isolate multi-restaurant data securely. Designed a responsive React.js frontend including a live Kitchen Display System (KDS).
- Avenaa:** Developed a modern short-term rental property management platform using the MERN stack (React 19, Express, MongoDB). Integrated the external Rentalwise Partners API via an Express backend proxy using HTTP Basic Auth, handling secure data synchronization for live property quotes, availability calendars, and booking creation.
- Borkie:** Built the core backend architecture for a dedicated pet service management web application. Utilized Java Spring Boot and MongoDB alongside Firebase Auth for secure identity verification. Implemented complex booking lifecycles, user/deliverer role management, and endpoints to support dynamic GPS tracking.

EDUCATION

Bachelor of Computer Applications (BCA)

Graduated: Feb 2026

Dr. Bhimrao Ambedkar University, Agra | Computer Software Engineering
